PROFESIONAL PROFILE

Experienced iOS Developer with a demonstrated history of working in the program development industry. Skilled in iOS Applications (Swift Testing · XCTest · Concurrency · UIKit · Swift · ObjC), Software Engineering (System and UX Design) and Data Science (Python). Strong engineering professional with a Master's degree focused in Data science from Queen Mary University of London.

QUALIFICATION

- 3 years in developing applications using .NET Technologies.
- 12 years in developing iOS applications using Objective-C, Swift, since 2013.
- 2 years in developing machine learning model and data pipeline using python.
- Good analytical skill which I've learnt from many project's development life cycle.
- Self-motivate and Self-learner.

EDUCATION

MSc. Big Data Science, Queen Mary University of London, United Kingdom 2018-2019	Pass
Master of Management Entrepreneurship and Innovation, Mahidol University, Thailand, 2014 - 2016	GPA 3.61
Scholarship Student of IT Smart Gen-X, National Science and Technology Development Agency (NSTDA) (1 May 2009 - 30 April 2010)	Graduated
B.Sc. Computer Science, Bansomdejchaopraya Rhajabhat University, Thailand, GPA 3.4 2005-2012	GPA 3.4

WORK EXPERIENCE

Present **Software Specialist, iOS at ASB Bank**
Sep 2023

ASB Mobile Banking : iOS Specialist, Member of Digital Open Banking team

- Maintain and develop an application using Swift language with MVVM and Clean architecture.
- Develop and maintain Open Banking features using SwiftUI and Concurrency frameworks.
 - Handle customer consents UX and UI flow.
 - Handle customer entry points and manage notification
- Review iOS team's pull request which need to past the code practice, unit test coverage
- Support and develop UI Component for share across the App
- Migrate XCTest to Swift Testing

Sep 2023 **Software Specialist, iOS at True Digital Group co., Ltd.**
April 2022

TruelD : iOS Specialist, Member of subscription team

- Maintain and develop an application using Swift language with MVVM and Clean architecture.
- Developed an In-App Purchase Transaction manager using SwiftUI, Combine, Firestore and Moya frameworks.
 - Manage and validate apple's transactions.
 - Pre and Post processing with Back-end server.
- Developed Validating users' Entitlements use-cases using Combine and Moya frameworks.
 - Request and Cache user's entitlements.
 - Observe user authentication activities to manage the entitlements.
- Review iOS team's pull request which need to pass 80 code coverage, with unit-test, and no code smells in their code.
- Refactor RxSwift to Combine.
- Improve application code coverage by adding missing unit tests to subscription use cases.

March 2022 Senior iOS Developer & Data Scientist at Digital Government
Sep 2019 Development Agency

Citizen Portal : Senior iOS Developer & Data Scientist (Agile Team)

- Develop eKYC Processes using Swift language with UIKit, Google's ML and 3rd Party APIs.
 - Liveness Detection using Google's ML and Seen AI APIs.
 - OCR Detection using Google's ML and Seen AI APIs.
 - Verification UI flow using Storyboard, UIKit and Lottie Framework, Lottie is animation framework from AirBnb.
- Design data collection for analytic for executives.
 - Design data collection for analytic in Mongo DB
 - Design and develop data cleaning algorithm using Python

Sep 2019 Senior Software Engineer at Digital Government Development
April 2015 Agency

Saraban Archive iOS Application : Team Lead

- Develop application using MVVM architecture, Model, ViewController, ViewModel
 - Develop UI with UIKit
 - Handle API Request with Custom DataTask extension with Swift Closure.
-

Rama Hospital Appointment Application : Team Lead

- Develop application using MVVM architecture, Model, ViewController, ViewModel
 - Develop UI with UIKit
 - Manage Ui flow with Storyboard

King's Day iOS Application : Project Manager & Developer

- Develop application using MVVM architecture, Model, ViewController, ViewModel
 - Develop UI with UIKit
 - Export user's custom Quote to Image by custom UIView.
 - Develop custom sharing feature to share user's result to social medias.

Aug 2013 Senior iOS Developer at MFEC CO., LTD (3 months contract)
June 2013

K-Mobile Banking PLUS : iOS Team Lead

- Design and develop application using Obj-C language
- Cooperate with business team to design UX of the application

May 2013 Junior Software Engineer at Electronic Government Development
May 2010 Agency

Supreme Court Application (Window Application) : C# Developer

- Custom Microsoft Word extension to limit user behavior and migrate working documents automatically.

PROJECTS

LawLover **My side project, I create the application that help my Thai Lawyer friends to search Thai Law Code easier.**
(<https://apps.apple.com/us/app/law-lover/id1499336777>)

- Data cleansing from open Thai Law Documents, pdf format, using Python.
 - Develop an application using Swift Language with UIKit, Storyboard, and SQLite.
 - Develop a Text Highlighting feature with custom NSMutableString with index calculation.
 - Develop Sharing feature using Apple's built-in share framework.
-

Singha Surveys **Outsource Project, I and my friends form the team to working for Boonrawd Brewery in their system, we did all front-end and back-end, for their sale forces. In this project, I'm a Project manager and iOS Developer.**
(<https://apps.apple.com/us/app/singha-surveys/id1454743594>)

- Develop an application using Swift Language with UIKit, Storyboard and Custom DataTask manager.
 - Develop tracking feature using background process and Apple's built-in location manager.
 - Develop survey UI with custom UIKit which support all input type for survey
 - Develop a custom calendar with Custom UICollectionViewController.
-

Covid-Lab **Volunteer, we create a website for all COVID-19 Testing Laboratories in Thailand.**
(<https://covid-lab.co/search>)

- Data cleansing from open-data and clown-sourcing from media using python and google sheet
 - Design Data structure.
-

Thai-Election-66 open data **Volunteer, we collect and open data in machine readable format.**
(<https://pollstation.pages.dev/landing>)

- Data cleansing from open-data using python and google sheet
